

# KIET Group of Institutions

(Department of Computer Science & Engineering)  
CSE/ B.Tech VII Semester  
Pre-University Examination, (2021-22) ODD Semester  
Deep Learning (KCS078)

Duration: 3 hrs

Max. Marks: 100

**Note: -Attempt all the Questions.**

Section-A		(10X2=20)			
Q. No.	Question	Marks	CO	BL/ KC*	
1.	a Define neural network.	2	CO1	1/F	
	b Explain how deep Learning is more efficient than ML in case of feature extraction?	2	CO1	2/C	
	c Discuss the difference between Shallow network and Deep Neural network.	2	CO2	2/C	
	d State any two practical applications of GAN in real life.	2	CO2	1/F	
	e Discuss in brief how LDA differs from PCA	2	CO3	2/C	
	f Discuss relationship of metric learning to deep learning.	2	CO3	1/F	
	g What is dimensionality reduction ?	2	CO4	1/F	
	h State the concept of LSTM.	2	CO4	1/C	
	i What is NLP ?	2	CO5	1/C	
	j Discuss bioinformatics with respect to its relation with Deep learning.	2	CO5	2/P	
Section-B		(5X6=30)			
Q. No.	Question	Marks	CO	BL/ KC*	
2	Discuss in brief about Universal Function Approximation	6	CO1	2/C	
	OR				
	Write a short note on logistic regression.				
3	Explain the probabilistic theory of Deep Learning.	6	CO2	4/C	
	OR				
	Explain the concept of Regularization. Explain its different types.				
4	Explain the various hyper parameters required for deep learning optimization.	6	CO3	4/P	
	OR				
	Explain the various techniques of weights initialization in deep learning.				
5	Illustrate the concept of deep reinforcement learning.	6	CO4	4/C	
	OR				
	Illustrate the concept of Artificial Neuroscience.				
6	Analyze the face recognition mechanism in deep learning using some case study.	6	CO5	4/C	
	OR				
	Analyze the NLP mechanism in deep learning using some case study.				
Section-C		(5X10=50)			
Q. No.	Question	Marks	CO	BL/ KC*	
7	 <p>Apply BPN for a single iteration on the following neural network. Assume learning rate be 0.8</p>	10	CO1	3/C	
	Relate SVM, Logistic regression, ANN and CNN ?				
	Justify the concepts and use of GAN in AI domain?				
8	OR	10	CO2	6/C	

- CO -Course Outcome generally refer to traits, knowledge, skill set that a student attains after completing the course successfully.

	Justify the concepts and use of Semi Supervised learning in AI domain.			
9	Consider the two dimensional patterns (5, 6), (6, 7), (7, 8). Compute the principal component using PCA Algorithm.	10	CO3	4/P
	OR			
	Compare PCA and LDA. How do LDA works for dimension reduction.			
10	Design a recurrent networks for time series prediction, elaborating it's architecture as well.	10	CO4	4/P
	OR			
	Explain LSTM network and elaborating it's architecture as well.			
11	Analyze the Wave Net deep generative model of raw audio waveforms.	10	CO5	4/F
	OR			
	Analyze the Word2vec technique for NLP.			

**(Department of Computer Science and Engineering)**  
**B. Tech. in Computer Science and Engineering ,7<sup>th</sup> Semester**  
**CT-1, (2021-22)Odd Semester**  
**Course:Deep Learning (KCS 078)**

**Duration: 2hrs**

**Max. Marks: 60**

**Section-A**

**Attempt all the questions of this section**

**(2X10=20)**

Q. No.	Question	Marks	CO	BL/ KC
1.	a Discuss the role of bias in ANN?	2	CO1	1/F
	b Explain the concept of Machine Learning?	2	CO1	2/C
	c What are support vectors in SVM Algorithm?	2	CO1	1/F
	d Define feed forward Multilayer Perceptron.	2	CO1	1/F
	e Outline the demerits of ML.	2	CO1	1/F
	f Discuss the difference between Shallow network and Deep Neural network.	2	CO2	2/C
	g Define SVM Kernels? Where it is used ?	2	CO1	1/F
	h Define artificial neural network.	2	CO1	2/C
	i State the need of activation functions in neural networks?	2	CO1	1/F
	j Discuss the role of dropout in overfitting.	2	CO2	2/C

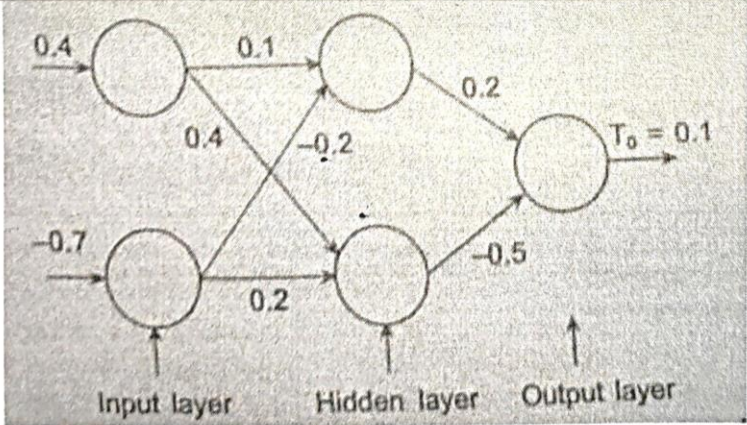

**Section-B**

**Attempt all the questions of this Section(5X4=20)**

Q. No.	Question	Marks	CO	BL/ KC
2	Compare and Contrast AI, ML and DL.	5	CO1	4/C
	OR			
	Classify the various learning strategy of ML.			
3	Correlate RNN through Multilayer Perceptron?	5	CO1	4/C
	OR			
	Explain loss functions? Illustrate about various loss functions.			
4	Discuss Regularization. Explain its different types.	5	CO2	2/C
	OR			
	Elaborate the probabilistic theory of Deep Learning.			
5	Discuss Universal Function Approximation theorem for neural network.	5	CO1	2/C
	OR			
	Describe SVM and it's limitations			

**Section-C**

**Attempt all the questions of this Section (10X2=20)**

Q. No.	Question	Marks	CO	BL/ KC
6	 <p>Apply Forward Propagation and Backward propagation for a single iteration on the following neural network. Assume learning rate be 0.6</p> <p align="center">OR</p>	10	CO2	3/P

	Illustrate the differences among Gradient Descent Algorithm, Stochastic Gradient Descent Learning, Mini-batch gradient descent									
7	Apply perceptron Learning Algorithm for AND function having two inputs and a bias denoted as $X_0 = -1$ Assume the learning rate be 0.1 and the initial weights be	10	CO1	3/P						
	<table><tr><td><math>W_0</math></td><td><math>W_1</math></td><td><math>W_2</math></td></tr><tr><td>0.5</td><td>0.5</td><td>0.5</td></tr></table>				$W_0$	$W_1$	$W_2$	0.5	0.5	0.5
	$W_0$				$W_1$	$W_2$				
	0.5				0.5	0.5				
OR										
Apply Logistic Regression using sigmoid function through a suitable example for classification problem.										

- **CO** –Course Outcome, generally, refer to traits, knowledge, skill set that a student attains after completing the course successfully.
- **BL**–As per Revised Bloom's Taxonomy, Bloom's Levels (BLs) are the cognitive process levels viz. **1. Remember, 2. Understand, 3. Apply, 4. Analyze 5. Evaluate and 6. Create**
- **KC** –As per Revised Bloom's Taxonomy, Knowledge Categories (KCs) are **F-Factual, C-Conceptual, P– Procedural, M - Metacognitive**

# KIET Group of Institutions, Delhi - NCR, Ghaziabad

(Roll Number: 1802910129)

(Department of Computer Science and Engineering)

B. Tech. 7<sup>th</sup> Semester

CT-2, (2021-22) Odd Semester

Course: Deep Learning (KCS 078)

Duration: 2hrs

Max. Marks: 60

## Section-A

Attempt all the questions of this section

(2X10=20)

Q. No.	Question	Marks	CO	BL/ KC
1.	a Discuss the role of CNN?	2	CO2	2/F
	b Explain the concept of GAN?	2	CO2	2/C
	c What do you understand by the term dimensionality reduction?	2	CO3	1/F
	d State any two uses of Semi supervised learning in real life.	2	CO2	1/F
	e Outline the merits of Semi supervised learning.	2	CO2	1/F
	f Discuss the difference between Shallow network and Convolution Neural network.	2	CO2	2/C
	g Define Generative modeling? Where it is used ?	2	CO3	1/F
	h Define LDA?	2	CO2	2/C
	i State the need of Mahalanobis distance in metric learning?	2	CO3	1/F
	j Discuss the role of central point in LDA.	2	CO3	2/C

## Section-B

Attempt all the questions of this Section(5X4=20)

Q. No.	Question	Marks	CO	BL/ KC
2	Explain Batch Normalization with a suitable example.	5	CO3	4/C
	OR			
	Classify the various types of autoencoders.			
3	Explain the role of max pooling and min pooling in CNN.	5	CO2	4/C
	OR			
	Explain VC dimension with example? Illustrate about various applications of VC dimension.			
4	Explain Generative Model in GAN	5	CO2	2/C
	OR			
	Explain the role of convolution layer in CNN.			
5	Discuss the role of auto encoders and it's components with a suitable diagram.	5	CO3	2/C
	OR			
	Elaborate the concept of metric learning in reference to deep learning.			

## Section-C

Attempt all the questions of this Section (10X2=20)

Q. No.	Question	Marks	CO	BL/ KC																																																										
6	<p>Given below is an input matrix named I, kernel matrix, calculate the Convolved matrix C using stride =1 also apply max pooling on C.</p> <p style="text-align: center;">Input Matrix I</p> <table><tr><td>1</td><td>0</td><td>0</td><td>1</td><td>1</td><td>0</td><td>1</td></tr><tr><td>0</td><td>0</td><td>1</td><td>1</td><td>1</td><td>0</td><td>1</td></tr><tr><td>1</td><td>1</td><td>1</td><td>0</td><td>1</td><td>0</td><td>1</td></tr><tr><td>1</td><td>1</td><td>0</td><td>1</td><td>0</td><td>0</td><td>0</td></tr><tr><td>1</td><td>0</td><td>1</td><td>0</td><td>1</td><td>1</td><td>0</td></tr><tr><td>0</td><td>1</td><td>1</td><td>0</td><td>0</td><td>1</td><td>1</td></tr><tr><td>0</td><td>1</td><td>1</td><td>1</td><td>0</td><td>1</td><td>1</td></tr></table> <p style="text-align: center;">Kernel Matrix</p> <table><tr><td>1</td><td>0</td><td>0</td></tr><tr><td>0</td><td>1</td><td>1</td></tr><tr><td>1</td><td>1</td><td>0</td></tr></table>	1	0	0	1	1	0	1	0	0	1	1	1	0	1	1	1	1	0	1	0	1	1	1	0	1	0	0	0	1	0	1	0	1	1	0	0	1	1	0	0	1	1	0	1	1	1	0	1	1	1	0	0	0	1	1	1	1	0	10	CO2	3/P
	1	0	0	1	1	0	1																																																							
	0	0	1	1	1	0	1																																																							
1	1	1	0	1	0	1																																																								
1	1	0	1	0	0	0																																																								
1	0	1	0	1	1	0																																																								
0	1	1	0	0	1	1																																																								
0	1	1	1	0	1	1																																																								
1	0	0																																																												
0	1	1																																																												
1	1	0																																																												
OR																																																														
Illustrate the various steps involved in CNN for feature learning and classification of any typical image. Elaborate with a suitable diagram.																																																														

7	Consider the two dimensional patterns (2, 1), (3, 5), (4, 3), (5, 6). Compute the principal components using PCA Algorithm.	10	CO3	3/P
	OR			
	Illustrate the various steps of LDA in dimensionality reduction with a suitable example.			

- **CO** –Course Outcome, generally, refer to traits, knowledge, skill set that a student attains after completing the course successfully.
- **BL**–As per Revised Bloom’s Taxonomy, Bloom’s Levels (BLs) are the cognitive process levels viz. **1.** Remember, **2.** Understand, **3.** Apply, **4.** Analyze **5.** Evaluate and **6.** Create
- **KC** –As per Revised Bloom’s Taxonomy, Knowledge Categories (KCs) are **F**-Factual, **C**-Conceptual, **P**– Procedural, **M** - Metacognitive

**B.TECH.**  
**(SEM VII) THEORY EXAMINATION 2021-22**  
**DEEP LEARNING**

**Time: 3 Hours**

**Total Marks: 100**

**Note: 1. Attempt all Sections. If require any missing data; then choose suitably.**

**SECTION A**

**1. Attempt all questions in brief.**

**2 x 10 = 20**

- a. What are the applications of Machine Learning? When it is used.
- b. What is deep learning ; Explain its uses and application and history.
- c. What is Visual Geometry Group (VGG)?
- d. What is SVMs and Perceptrons?
- e. What is Neural networks as universal function approximates?
- f. What are batch normalization?
- g. Define Generative Adversarial Networks (GAN).
- h. What are dimensionality reduction techniques?
- i. What is deep learning techniques?
- j. Define Optimization in deep learning.

**SECTION B**

**2. Attempt any three of the following:**

**10 x 3 = 30**

- a. Draw and explain the architecture of convolution network .
- b. Difference between Deep and Shallow Network.
- c. What is semi – supervised learning
- d. Explain Back propagation with its algorithm.
- e. Explain different components of SOA and their functionalities.

**SECTION C**

**3. Attempt any one part of the following:**

**10 x 1 = 10**

- (a) Explain LSTM (Long Short Term Memory ).
- (b) What is PCA (Principle Component Analysis ) and RNN.

**4. Attempt any one part of the following:**

**10 x 1 = 10**

- (a) What are some common problems with LSTM?
- (b) How AI and neuroscience drive each other forwards?

**5. Attempt any one part of the following:**

**10 x 1 = 10**

- (a) Explain Fractal Structure and Generalization Properties of Stochastic Optimization Algorithms.
- (b) What are the applications of a recurrent neural network RNN?

**6. Attempt any one part of the following:**

**10 x 1 = 10**

- (a) Explain Recurrent Neural Networks and Natural Language Processing.
- (b) What are good quality word embedding and how to generate them?

**7. Attempt any one part of the following:**

**10 x 1 = 10**

- (a) How will the use of facial recognition by private companies affect privacy?
- (b) Explain Image Captioning in Deep Learning.
